Alex Rivera

Senior Full-Stack Engineer

alex.rivera.dev@example.com | +1 (555) 234-5678 | San Francisco, CA | linkedin.com/in/alexrivera-example | github.com/alexrivera-example

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years building resilient web services, low-latency microservices, and modern responsive React applications. Expert in Python (FastAPI), TypeScript, and containerized cloud systems with proven metrics including a 45% latency reduction and handling 25M+ daily requests.

TECHNICAL & CORE SKILLS

Languages & Frameworks: AWS, Docker, FastAPI, GraphQL, Kubernetes, PostgreSQL, Python, React, Redis, TypeScript
Tools & Infrastructure: Git, GitHub Actions

PROFESSIONAL EXPERIENCE

Software Engineering Intern — NovaTech Labs

2019-06 – 2019-08 | Palo Alto, CA

- Developed internal administration portal widgets in React and Flask to monitor background ETL jobs.
- Refactored legacy database migration scripts, resolving recurring deadlock issues during scheduled batch processing.
- Participated in daily standups and sprint planning sessions within an agile Scrum squad.

Full-Stack Software Engineer — DataNexus Systems

2020-06 – 2022-02 | San Jose, CA

- Built and maintained core SaaS web applications using React, TypeScript, Python, and PostgreSQL.
- Automated data pipeline extraction workflows handling 500GB+ daily customer telemetry data using Python and SQL.
- Designed role-based access control (RBAC) and OAuth2 authentication safeguarding sensitive client data.
- Authored 150+ unit and integration tests, increasing core backend service code coverage from 68% to 91%.

Senior Full-Stack Engineer — CloudScale Technologies

2022-03 – Present | San Francisco, CA

- Architected resilient REST and GraphQL microservices in Python (FastAPI) and TypeScript that serve 25M+ requests daily with 99.98% uptime.
- Optimized high-volume database queries and introduced Redis distributed caching, slashing average API response latency by 45%.
- Spearheaded the migration of monolithic workloads to AWS EKS (Kubernetes), reducing infrastructure provisioning time from 4 hours to 8 minutes.
- Mentored 6 software engineers on clean code practices, system observability, and CI/CD automated test pipelines.
- Collaborated with product designers and frontend teams to deliver 12 major enterprise features with zero critical production bugs.

NOTABLE PROJECTS

Real-Time Collaborative Document Canvas (Node.js, TypeScript, React, Redis, Docker)

2021-03 – 2021-09

- Constructed WebSocket synchronization server in Node.js facilitating sub-20ms multi-client cursor updates.
- Utilized Redis pub/sub channels to broadcast delta patches across distributed server instances with zero state corruption.
- Engineered end-to-end unit and integration test suites achieving 94% test coverage using Jest and GitHub Actions CI.

Cloud Cost & Telemetry Dashboard (React, TypeScript, Tailwind CSS, FastAPI, AWS, SQLAlchemy)

2022-06 – 2022-12

- Designed a responsive Single Page Application using React, TypeScript, and Tailwind CSS with interactive chart visualizations.
- Integrated AWS Cost Explorer API and CloudWatch metrics to automatically detect anomalous infrastructure spend spikes.
- Engineered automated daily report generation exporting multi-tenant summaries to PDF and CSV formats.
- Reduced monthly development AWS expenditures by 28% across 14 team accounts.

EDUCATION

University of California, Berkeley — Bachelor of Science in Computer Science 2016-08 – 2020-05
(GPA: 3.85 / 4.0)

- Dean's Honors List (6 consecutive semesters)
- Relevant Coursework: Distributed Systems, Database Architecture, Machine Learning, Operating Systems
- President of Association for Computing Machinery (ACM) Student Chapter

CERTIFICATIONS & HONORS

- **HashiCorp Certified: Terraform Associate** — HashiCorp (2023-09)
- **Certified Kubernetes Administrator (CKA)** — Linux Foundation & CNCF (2023-05)
- **Engineering Excellence Award**: Awarded for leading the zero-downtime database migration initiative and achieving a 45% query latency improvement.
- **1st Place Winner - SF Global Cloud Hackathon 2023**: Designed and deployed an AI-assisted cloud incident triaging engine in 36 hours among 180 participating engineering teams.
